SUMMARY

Full Stack Developer with practical experience developing end-to-end web applications using the MERN stack. Skilled in designing responsive user interfaces, building secure REST APIs, and managing databases for scalable applications. Demonstrated ability to deliver complete solutions from frontend to backend. Actively seeking opportunities to build and optimize production-level applications.

EDUCATION

Er. Perumal Manimekalai College of Engineering 2021 – 2025
Bachelor of Technology (IT) – CGPA: **7.7** Hosur

Vailankanni Matriculation Higher Secondary School 2020 – 2021
High School (PCMC) – Percentage: **77%** Krishnagiri

TECHNICAL SKILLS

Languages: Python, JavaScript, Dart, SQL

Frontend Technologies: HTML5, CSS3, React.js, Bootstrap5, Tailwind CSS

Frameworks And Libraries: Node.js, Express.js, REST APIs

Mobile Development: Flutter

Databases: MongoDB, MySQL

Tools And Platforms: Git, GitHub, Postman, Power BI, Microsoft Excel

PROJECTS

Stayease – Property Booking Web Application

- Developed a full-stack property booking platform using the MERN stack, enabling users to register, log in, browse properties, and manage bookings through a responsive web interface.
- Built RESTful APIs with Node.js and Express.js to handle authentication, property listings, and booking operations with proper request-response handling.
- Implemented secure JWT-based authentication and protected routes to ensure authorized access to user-specific features such as bookings.
- Designed and managed MongoDB database schemas using Mongoose for efficient storage of user, property, and booking data.
- Integrated React frontend with backend APIs using Axios, enabling dynamic data fetching and seamless frontend-backend communication.

Crop Yield Prediction using Machine Learning

- Developed a machine learning model to predict crop yield based on environmental factors such as rainfall, temperature, soil type, and climatic conditions.
- Performed data preprocessing and feature analysis using Pandas and NumPy to clean, transform, and prepare agricultural datasets for training.
- Analyzed agricultural and environmental data to improve the accuracy of crop yield prediction.
- Built a user-friendly interface to display prediction results and support better decision-making for users.
- Designed a system that helps estimate agricultural output, supporting data-driven decision making for farmers and agricultural planning.

Music Playlist Application | *Web And Mobile*

- Developed a cross-platform music playlist application with both web (HTML, CSS, JavaScript) and mobile (Flutter, Dart) implementations.
- Designed and built responsive user interfaces for playlist creation, song management, and navigation across both platforms.
- Implemented core functionalities including adding, organizing, and managing songs within playlists.
- Applied DOM manipulation and event handling for dynamic behavior in the web version, and state management for smooth interaction in the Flutter app.
- Ensured consistent user experience across platforms by maintaining similar design structure and functionality.

HR Attrition Analysis Dashboard

- Performed data cleaning and transformation using Power Query to prepare HR datasets for analysis
- Developed calculated measures and KPIs using DAX to track attrition rate, tenure, and salary trends
- Built a structured data model to enable efficient analysis across departments, roles, and demographics
- Analyzed employee attrition patterns to identify key factors affecting retention, including tenure, job role, and work-life balance
- Designed an interactive Power BI dashboard with filters and drill-downs to visualize workforce insights and support data-driven decision-making

INTERNSHIP

PySpiders Software Training

June 2025 – Oct 2025

Full Stack Development Intern

Bengaluru

- Built responsive web pages using HTML, CSS, and JavaScript.
- Worked on Python- and SQL-based problem-solving tasks.
- Created visualizations using Power BI for structured datasets.
- Applied debugging and code optimization techniques to improve application reliability.

CERTIFICATIONS

- SQL Advanced – HackerRank
- Python Full Stack with Data Analytics – PySpiders
- Power BI – Microsoft Office Master
